

Reclama

Card disputes with verifiable evidence

The customer confirms an exact charge.
The reviewer receives an auditable case.

Roberto Villafuerte

A complete request in Spanish and Portuguese

01

Identify

Customer ownership and exact charge

02

Confirm

Separate facts from the customer statement

03

Record

Write and read back

The agent retains the context

Verifiable facts

Customer statement

Unanswered questions

Implemented architecture

Local intent inference. Total operating cost remains unmeasured.

Full corpus review exposes limited intent coverage

7,671

CSV files inspected

13 tables.
Source hashes verified.

23.5M

rows across the corpus

Complaints and transcripts:
238,416 rows reviewed.

47

distinct customer inputs

Spanish only.
Already seen in the sample.

Six intent classes lack AI-consensus reference examples. Portuguese has none.
This retrospective diagnostic cannot establish a valid ES/PT benchmark.

Organizer corpus diagnostics. Repeated rows are not independent customer cases.

A tested workflow with a conservative model

Exploratory AI reference: 25 texts

Method	Matches
Rules baseline	25/25
Frozen model v2	21/25

15/15

prepared API sequences

70 timed local requests.
Intake, ambiguity and handoff.

AI agreement is not ground truth.
Six classes have no reference support.

47/47 corpus inputs require clarification

No autonomous routing. Independent ES/PT evaluation remains pending.
Software QA does not establish financial resolution or model accuracy.

Sandbox. Team-created demo data. Request intake for human review.

Reproducible deliverables and next steps

Implemented prototype

ES/PT client and agent view
Persisted cases and traces
Contracts, tests and reproduction

Requirements for bank use

Institutional identity and policies
Case management integration
Validation with representative data

Open prototype

Public repository, landing page and guide. Case workflow requires sign-in.
Two-account isolation has not been validated.

Hackathon deadline: October 5, 23:59 UTC-5

Sandbox. Team-created demo data. Request intake for human review.
